

NASA SEWP VI Ordering Guide

Category C mission-based ITC/AV services through RBR-Technologies, Inc. (RBR)

RBR holds NASA SEWP VI Category C contract 80TECH26D1734. This guide explains how federal buyers can request quotes, issue orders, and reach RBR for support. Agency procurement offices issue orders; the SEWP Program Management Office processes and tracks them.

Contract at a glance

Contract holder	RBR-Technologies, Inc.
Contract number	80TECH26D1734
Awarded category	C — Mission-Based ITC/AV Service Solutions
Period of performance	November 1, 2026–October 31, 2036
CAGE code	6KY98
Master contract NAICS	541512
SEWP surcharge	0.34%, included in the total quoted price
Program support	SEWPVI@rbr-tech.com

SEWP VI scope and fair opportunity

The NASA SEWP (Solutions for Enterprise-Wide Procurement), pronounced "soup", is a multiple-award Government-Wide Acquisition Contract for information technology, communications, and audiovisual solutions and services.

RBR's Category C award covers mission-based ITC/AV services. Each requirement and quoted offering must fit the contract scope and be available under RBR's SEWP VI contract.

The agency applies FAR 16.505(b), applicable SEWP VI fair-opportunity terms, and its own procedures. The SEWP Quote Request Tool supports requests to eligible contract holders. The issuing procurement office maintains its order-selection documentation.

Buying Through RBR's SEWP VI Contract

Use the steps below to move from a mission requirement to an agency order. Confirm the applicable agency and SEWP procedures for your acquisition.

- Define the requirement**
1 Prepare the statement of work or scope, deliverables, performance location and period, anticipated contract type, agency contact, and response deadline.
- Confirm Category C fit**
2 Check that the requirement is within SEWP VI Category C and that RBR can quote the offerings under its contract. Send uncertain scope questions to help@sewp.nasa.gov.
- Provide fair opportunity**
3 Follow FAR 16.505(b), applicable SEWP VI provisions, and agency policy when selecting contract holders to consider. Document the agency's order-selection decision.
- Request a quote**
4 Use the SEWP VI Quote Request Tool when applicable. Email SEWPVI@rbr-tech.com for RBR program support. RBR responds through the SEWP system for requests originating there.
- Review the quote**
5 Check scope, pricing, quote validity, contract type, service terms, and the proposed order. The 0.34% SEWP administrative fee is included in the total quoted price.
- Issue the agency order**
6 The authorized agency official issues the delivery or task order using agency procedures. NASA SEWP reviews, processes, tracks, and forwards it; the PMO does not issue the agency's order.
- Manage performance and support**
7 Administer deliverables and acceptance under the awarded order. Send order modifications through the SEWP PMO. Contact RBR for installation, warranty, technical, software, or post-delivery issues.

Order Support and Payment

Installation, warranty, and post-delivery support

The awarded order and RBR quote define installation, basic or extended warranty, technical and software support, service levels, acceptance, and other post-delivery terms. For an issue, send RBR the agency order number, SEWP control number if available, affected service or item, a description, and the requested resolution. RBR coordinates with the agency and SEWP PMO as appropriate.

Payment and SEWP surcharge

RBR accepts electronic funds transfer and authorized government purchase card payments. The SEWP VI administrative handling fee is 0.34% and is included within the total quoted price. It is not shown as a separate line on quotes or orders. If a purchase card surcharge applies, RBR identifies its amount in the quote using the PURCHASECARD-Z CLIN in accordance with SEWP and applicable payment rules.
